**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 8, 17, and 24 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 7, and 14 of copending Application No. 10/637,302. Although the conflicting claims are not identical, they are not patentably distinct from each other because the support for steadying a person holding a bow of this instant application would encompass the support for a hunter using a firearm of claims 1, 7, 14 of copending Application No. 10/637,302.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8, 17, and 24 stand rejected under 35 U.S.C. 102(b) as being anticipated by Burkhead et al (US patent no. 5,385,536). Burkhead discloses a support comprising all the claimed features of applicant's invention (see examiner's illustrations below).

Furthermore regarding applicant's intended use of a hunter holding a firearm and to allow the wrist and forearm to move relative to trunk of a person, Burkhead's support is inherently capable of such intended use. Applicant is reminded that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

***Response to Arguments***

Applicant's arguments filed 9/1/2005 have been fully considered but they are not persuasive. Applicant's main argument is that the entire Burkhead's 536 patent focus on providing an orthopedic device that has a goal of immobilizing the patient's arm and shoulder and consequently does not show the user's wrist and forearm as being movable relative to the person's trunk. Examiner would like to point out that when Burkhead in his specification clearly states that Burkhead's support his support or positioning assembly can be pivoted and extended or retracted in assisting in this variation of the elevation of the arm support and enabling the variation of the orientation of the arm support are two universal joints (see Summary of the Invention section). A person using the Burkhead's device inherently would be capable of moving his wrist and forearm via the ball and socket joint of the support of Burkhead before the universal joint is locked in place. Burkhead has the additional capability of immobilizing or steadying just as in applicant's invention when the joints are locked in place.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 3632

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
